THE VALLEY OF PINE NUTS

A professionally Managed family business run by our forefather Mr. Raza Khan, our great father Mr. DAMIN KHAN (Late) and now is being look after by Mr. Amin and Mr. Sakhi Marjan.

Established In 1970, first and small facility was operated from Bannu Provinces of KPK by 1st generation in order to introduce and promote Pakistani Pine nuts to the world and domestic markets. After they succeeded in this field, 2nd generation has established the new company and factory, Located in Lahore & Islamabad. Our company continue to evolve and adapt its business activities though two factories.

The company has been set up step by step, to treat every customer management, we have transferred the Head Office under the leader ship of Mr. Amin Khan to Dubai United Arab Emirates in 2000.

Today, pine nuts are consumed in many countries around the world such as Europe, USA, Turkey, Jordan, Kuwait, Saudi Arabia & Middle East Countries. China is the top consumer of pine nuts. Since from Long time we have been carrying out business with china Buyers and Direct Export Pine nuts from Pakistan and Afghanistan in the raw material shape and then supply to different buyers in China.

To achieve the Target, we have decided in 2010 to build up Own Office setup in China under the supervision of Mr. Marjan. And today, thanks to the hard work and effort of Mr. Marjan we are counted among the so-called Top order Suppliers of Pak Afghan Pine Nuts in China provinces.

We are proud to have a good track record in the international and domestic market of Pine Nuts as we have fulfilled all our obligations on time.

ABOUT PINE NUT

The Chilgoza pine (pinus gerardiana) is found in the western Himalayan forests of Pakistan, Afghanistan.

In Pakistan Chilgoza is found in the Khyber Pakhtunkhwa and Baluchistan Provinces, the northern Areas (Gilgit Agency and Kashmir). Chilgoza pine is a hardy tree and can endure excessive drought, high winds, and severe cold in the winter, nearly 20 percent of Pakistani forests comprise of Chilgoza trees.

PINE NUT PROCESSING MACHINE

Pine Cone Drying Machine

Pine cones can be dried using air drying oven. The drying oven can be heated by steam or electricity. It has high efficiency and can dry evenly. Different capacities are designed for this machine.

Pine Nut Roasting Machine & Shelling Machine

For the different purpose and different capacity, there are various roasting machines for choice. Medium nut roasting machine is ideal for commercial use. Mini nut roasting machine is flexible and easy to move anywhere. Pine nuts are covered with hard shell. The removal of shell when consumption is troublesome. Chilgoza seed is cylindrical and 2 to 3 centimetres long. We have specially designed a pine nut shelling unit for Pakistan customers. The Shelling Unit consists of pine nut grading machine, pine nut shelling machine, and pine nut kernel & shell separating machine. The pine nut grader is mainly used for grading different sizes of pine nuts of any size. Pine nut kernel & shell separator is used for processing pine nuts of any size. Pine nut kernel & shell separator is used for separating kernels from shells after shelling process.

Pine Nut Processing in Pakistan

The Harvest season begins in early September, Local People collect green cones by self-picking from trees and bury for about a fortnight till the cones open. Or cones are heaped and dried in the sun to allow open. Usually, cones from trees are collected by a long pole with an iron hook at the end. The injury is thus caused to the tree. Often men climb up the trees, causing many branches to be broken. The seeds are extracted by knocking cones against a hard surface. After seed extraction, pine nuts are roasted in their shell to improve flavour and shelf life. They are roasted in iron containers by mixing with soil over a fire.

Pine Nut Peeling Machine

Shelled Chilgoza nuts have a thin skin that can be removed by pine nut peeling machines. The machine can process dried or roasted pine nuts into peeled kernels without damage.
